Due Diligence in Practice “Getting your Hands Dirty” (Part 1)

Course No 212

This course is designed to familiarise attendees with the practical and real life circumstances of implementing a robust due diligence process. The Customer due diligence process (CDD) involves much more than carrying out research using the passport or other customer data available using one of the various monitoring systems and a ‘Google’ search. There are clear responsibilities that are related to AML/CFT, and this course will give a practical and hands-on approach on how to carry out the various CDD checks, how to deal with practical issues that are encountered on a day-to-day basis, and provide a practical insight to help subject persons, including compliance officers, compliance teams and MLROs, carry out their duties.
